

cardio>direct

At Cardio Direct, we firmly believe in preventative care.

We provide a comprehensive sports screening service in those aged 14 years and above. We work closely with the FA, professional football clubs and athletes from a variety of other sports, providing cardiology screening and on-going support. We also offer a mobile service, which enables us to screen the squads of professional clubs at their training ground. For individuals and enthusiasts the tests can be performed at our Harley Street Clinic.

Similarly for professional football players we can accommodate pre-signing cardiac screens when required.

The screen includes:

12 Lead ECG

An ECG is a quick, simple and painless test that records the electrical activity of the heart. This can help to identify abnormal rhythms or problems with the heart muscle.

Echocardiogram

An Echo is an ultrasound of the heart. It is non-invasive, safe and painless. The echo provides information about the heart structure and function; the size and shape of the heart chambers, valves and the blood flow.

Pre-screening Questionnaire & Consent Form

We will discuss your previous medical history and your family history to help to identify symptoms that may be of concern.

Results

All results are reviewed by our consultant cardiologists and reports received within 5 days.
